WELDING JOURNAL INDEX

VOLUME 62—1983

PUBLISHED BY THE AMERICAN WELDING SOCIETY, P.O. BOX 351040, Miami, FL 33135

Part 1—WELDING JOURNAL

SUBJECT INDEX

*Adaptive Welding System 'Calls the Shots' for Precision Joining—47 to 48 (Jan).
*Adding the "Negative" to Welder Training—Ed Shifrin, 48 to 50 (Aug).
Advances in Laser and MIAB Welding Techniques—K.I. Johnson, 15 to 20 (Feb).
*Air Cleaning?, What's Behind the Boom in Electronic—J.T. Ashe, 64 to 66 (Oct).
Alloy Weldment, Stress Corrosion Cracking in an Annealed 5083 Aluminum—D.N. Williams, 25 to 27 (Aug).
Aluminum Alloy Weldment, Stress Corrosion Cracking in an Annealed 5083—D.N. Williams, 25 to 27 (Aug).
Aluminum Brazing under Vacuum, Furnace Design Considerations for—L.L. Ashburn, 45 to 54 (Oct).
Aluminum Heat Exchangers in Inert Gas, A Fluxless Process for Brazing—D.J. Schmatz and W.L. Winterbottom, 31 to 38 (Oct).
*Amorphous Foils a Natural for Jet Tailpipe Brazing, 57 to 58 (Oct).
Assembly of High Performance Sheet Steel Structures, Evaluation of GMA Spot Welding for—W.P. Blankenship and R.P. Sprecace, 27 to 33 (Mar).
*Automated GMAW Speeds Production of Pulse Furnace—70 (Nov).
Automated Laser Beam Welding Facility for High Volume Production, Development of an—J.A. Miller and J. Chevalier, 49 to 54 (July).
*Automated NDT System Uses Fluorescent—Penetrant Inspection Method—55 (Dec).
Automated Welding System Design—Tools for Increased Welding Productivity, Considerations in—T.J. Glynn, 48 to 53 (Nov).
*Automatic GTA Welding System, Programmable Control Puts Precision in—63 to 64 (Nov).
Automatic Resistance Welding in the Electronic Industry—A.G. Forbes, 55 to 56 (Nov).
*Automatic Welding, System Hikes Production with Five Torch—72 (Nov).
*Automation Experience Benefits Newcomer to Robotics Welding—67 (Nov).
*Auto Radiator Production, Welded Brass Tube Mill Offers Pluses in—52 (Sept).
*AWS President, Training Tour is Fond Homecoming for an—62 to 63 (July).
*AWS Section Tapes Talks, Shares Knowledge—M. Marcus, 48 (June).

*Bike Wheel Welding, HF Line is Neater, Faster for—50 (Mar).
*Blower Housing Assembly, Weld Repair Proves Strong Link in—52 (Mar).
*Branch Joint Design for Easier Fit, Better Welding and Lower Cost, A—A.G. Hogaboom, 58 to 59 (July).
*Brass Tube Mill Offers Pluses in Auto Radiator Production, Welded—52 (Sept).
Brazing Aluminum Heat Exchangers in Inert Gas, A Fluxless Process for—D.J. Schmatz and W.L. Winterbottom, 31 to 38 (Oct).
*Brazing, Amorphous Foils a Natural for Jet Tailpipe, 57 to 58 (Oct).
Brazing a Multi-Target TRAX, Step—D.D. Berger, 41 to 43 (Oct).
Brazing of Film Probe Sensor Assemblies, Welding and—A.J. Moorhead, 17 to 27 (Oct).
Brazing under Vacuum, Furnace Design Considerations for Aluminum—L.L. Ashburn, 45 to 54 (Oct).

*Caustic Tank Welds Receive One-Shot Heat Treatment—60 (June).
*Coating Solves a Sticky Wear Problem, Flame Sprayed—42 (May).
Code Compliance—A Major Problem—E.R. Holby, 43 to 48 (Dec).
*Cold Bender Cuts Pipe Forming Costs—54 (Mar).
*Compressor Casings Are Redesigned as Weldments, Small—49 (Sept).
*Computer Controlled Presses Weld Alliance Underbody, Seven—39 (Feb).
*Computer Technology Adds Productivity to Pipe Cutting—57 (July).
Considerations in Automatic Welding System Design—Tools for Increased Welding Productivity—T.J. Glynn, 48 to 53 (Nov).
Control of Ozone during Welding of Copper-Base Alloys, Production and—A. Ditschun and M. Sahoo, 41 to 46 (Aug).
*Controller Helps 'Turn the Corner' in Resistance Seam Welding, Flexible—68 to 69 (Nov).
Copper-Base Alloys, Production and Control of Ozone during Welding of—A. Ditschun and M. Sahoo, 41 to 46 (Aug).
Copper-Nickel to Steel Shielded Metal Arc Weldments, The Structural Integrity of—S.M. Fisher, D. Frederick, M.R. Louthan, Jr., and J. H. Wilson, 37 to 43 (Mar).
Corrosion Cracking in an Annealed 5083 Aluminum Alloy Weldment, Stress—D.N. Williams, 25 to 27 (Aug).
*Cost, A Branch Joint Design for Easier Fit, Better Welding and Lower—A.G. Hogaboom, 58 to 59 (July).
*Costs with Unique Installation of Welding Equipment, Railcar

A Practical Welder article

Repair Shop – 51 (Aug).
Cracking in an Annealed 5083 Aluminum Alloy Weldment, Stress Corrosion – D.N. Williams, 25 to 27 (Aug).
*Craftsmanship Helps Recapture the Past, Welding – 46 to 47 (Apr).
Current Welding Research and Development at Six European Laboratories – J.F. Key, 33 to 38 (April).

Design and Fabrication of Power Transmission Poles – E.R. Holby, 29 to 34 (Aug).
*Design for Easier Fit, Better Welding and Lower Cost, A Branch Joint – A.G. Hogaboom, 58 to 59 (July).
Development of an Automated Laser Beam Welding Facility for High Volume Production – J.A. Miller and J. Chevalier, 49 to 54 (July).
Development of a Two-Directional Seam Tracking System with Laser Sensor – J.L. Pan, F.D. He, W.C. Chen, L.S. Gao, Q.H. Cao, M.S. Wu, and J.K. Wang, 28 to 31 (Feb).
Development of Fabricated Titanium Filler Metal Wire – T.J. Bosworth, C.W. Domby, R. Denale, and G.H. Macshane, 36 to 45 (Jan).
*Diesel Distributor Weld-Assembles Heavy Aircraft Tractors – R. D. Wright, 50 to 51 (Jan).
*Distributor's Contribution to Welding Technology, A – T.P. Schoonmaker, 49 to 51 (April).
*Don't Seal Weld Threaded Piping Connections – W.A. Bruce, 60 (July).
*Dual-Metal Connectors Conserve Material, Allow Design Flexibility, EB Welded – 59 (June).

*EB Welded Dual-Metal Connectors Conserve Material, Allow Design Flexibility – 59 (June).
Economic Justification of an Arc Welding Robot Installation, Methods for – V.J. Pavone, 40 to 46 (Nov).
Economics of Small Diameter, Flux Cored Electrodes – C. Zimmerman and D. Schmerling, 41 to 44 (April).
Education and Training in Welding Technology in a Developing Country – The Republic of South Africa – C. Smallbone, 22 to 34 (June).
*Electrodes Do Their Own Part Holding, Resistance Welding – 43 (Feb).
Electrode Industry, Hardfacing Helps in Grinding Tough Ferroalloys for Welding – M.H. Gilani, 36 to 38 (May).
Electrodes, Economics of Small Diameter, Flux Cored – C. Zimmerman and D. Schmerling, 41 to 44 (Apr).
Electronics Industry, Automatic Resistance Welding in the – A.G. Forbes, 55 to 56 (Nov).
*Equipment, Railcar Repair Shop Cuts Costs with Unique Installation of Welding – 51 (Aug).
European Laboratories, Current Welding Research and Development at Six – J.F. Key, 33 to 38 (Apr).
Evaluation of GMA Spot Welding for Assembly of High Performance Sheet Steel Structures – W.P. Blankenship and R.P. Sprecace, 27 to 33 (March).

Fabricated Titanium Filler Metal Wire, Development of – T.J. Bosworth, C.W. Domby, R. Denale, and G.H. Macshane, 36 to 45 (Jan).
Fabrication of a Superconducting Magnet Thermal Shield System, Use of Fusion Welding Techniques in the – E.N.C. Dalder, J.H. Berkey, Y. Chang, G.L. Johnson, G.H. Lathrop, D.L. Podesta and J.H. Van Sant, 17 to 26 (Dec).
Fabrication of High Alloy Stainless Steels, Some Considerations for – J.M. Grocki, 21 to 25 (Jan).
Fabrication of Power Transmission Poles, Design and – E.R. Holby, 29 to 34 (Aug).
Fatigue, Inspecting for – J.E. Jones, 21 to 24 (May).
Ferroalloys for Welding Electrode Industry, Hardfacing Helps in Grinding Tough – M.H. Gilani, 36 to 38 (May).
FGD Fabrication – An Opportunity for Excellence – E.R. Dille and R.H. Espy, 15 to 18 (Jan).
Filler Metal Wire, Development of Fabricated Titanium – T.J. Bosworth, C.W. Domby, and G.H. Macshane, 36 to 45 (Jan).
*Five Points in Choosing Depressed Center Grinding Wheels – 49 (Jan).
*Flame Sprayed Coating Solves a Sticky Wear Problem – 42 (May).
*Flexible Controller Helps 'Turn the Corner' in Resistance Seam Welding – 68 to 69 (Nov).
Flux Cored Electrodes, Economics of Small Diameter – C. Zimmerman and D. Schmerling, 41 to 44 (Apr).
Fluxless Process for Brazing Aluminum Heat Exchangers in Inert Gas, A – D.J. Schmatz and W.L. Winterbottom, 31 to 38 (Oct).
*Ford Mini-Truck to Ride on HSLA Steel – 52 (Jan).
Forty-Four Ways to Improve Your Hardfacing Operation – R.L. Chavanne, 15 to 18 (May).
*Free Welding Booth Helps Maintain Race Cars, Equipment at Budweiser-Cleveland 500 – 61 to 62 (Nov).
Friction Welding, Radial – E.D. Nicholas, 17 to 29 (July).
Furnace Design Considerations for Aluminum Brazing under Vacuum – L.L. Ashburn, 45 to 54 (Oct).
Fusion Welding Techniques in the Fabrication of a Superconducting Magnet Thermal Shield System, Use of – E.N.C. Dalder, J.H. Berkey, Y. Chang, G.L. Johnson, G.H. Lathrop, D.L. Podesta and J.H. Van Sant, 17 to 26 (Dec).

*GMA Gun Changeover Results in Major Savings – 47 (Sept).
GMA Spot Welding for Assembly of High Performance Sheet Steel Structures, Evaluation of – W.P. Blankenship and R.P. Sprecace, 27 to 33 (Mar).
GMAW – A Versatile Process on the Move – K.A. Lyttle, 15 to 23 (March).
*GMAW Speeds Production of Pulse Furnace, Automated – 70 to 71 (Nov).
*Grinding Costs, Measuring Weld – R. Pooles, 46 to 47 (Mar).
Grinding Tough Ferroalloys for Welding Electrode Industry, Hardfacing Helps in – M.H. Gilani, 36 to 38 (May).
*Grinding Wheels, Five Points in Choosing Depressed Center – 49 (Jan).
*GTA Welding System, Programmable Control Puts Precision in Automatic – 63 to 64 (Nov).

Hardfacing Helps in Grinding Tough Ferroalloys for Welding Electrode Industry – M.H. Gilani, 36 to 38 (May).
Hardfacing Operation, Forty-Four Ways to Improve Your – R.L. Chavanne, 15 to 18 (May).
*Hardfacing System Combats Wear, Programmed – 44 (May).
Hazard Awareness, Training Welding – E.G. Hornberger and T.R. Vann, 41 to 45 (Sept).
Heat Exchanger, An In-Place Repair Method for Sodium Steam – G.E. Sheward and M. Baron, 39 to 47 (July).
Heat Source Capsules for Space Missions, Welding Iridium – W.R. Kanne, Jr., 17 to 22 (Aug).
*Heat Treatment, Caustic Tank Welds Receive One-Shot – 60 (June).
Heat Treatment, Thermocouples – Essential Devices for Proper Control of Local Weld – F.C. Eller, Jr., 38 to 40 (Dec).
Heavy Section Welding, Laser Offers Key Economies in – J. Weber, 23 to 26 (Feb).
*HF Line is Neater, Faster for Bike Wheel Welding – 50 (Mar).
High Alloy Stainless Steels, Some Considerations for Fabrication of – J.M. Grocki, 21 to 25 (Jan).
High Alloy Stainless Steel Weldments in Oxidizing Environments, Pitting Corrosion of – A. Garner, 27 to 34 (Jan).
High Quality Large Components 'Shape Welded' by a SAW

*A Practical Welder article

Process – K. Kussmaul, F.-W. Schoch and H. Luckow, 17 to 24 (Sept).
*HSLA Steel, Ford Mini-Truck to Ride on – 52 (Jan).
*Hull Plate Stiffeners, Magnetic Device Speeds Placement of – 52 (Aug).
*Hydraulic Welding Fixture Helps Build Giant Accelerator Magnets – 51 (Dec).

Identification and Start-up of a Successful Robotic Arc Welding Application – J.H. Gage, 19 to 26 (Nov).
Importance of Preheat/Postheat in Repair Welding, The – R.M. Manning, 27 to 34 (May).
*Improper Part Alignment, Vision System Spots, Corrects – 58 (June).
*Indexing Drive Moves Heavy Load with High Accuracy, Welding Machine, 62 to 63 (Oct).
In-Place Repair Method for Sodium Steam Heat Exchanger, An – G.E. Sheward and M. Baron, 39 to 47 (July).
Inspecting for Fatigue – J.E. Jones, 21 to 24 (May).
*Inspection Method, Automated NDT System Fluorescent-Penetrant – 55 (Dec).
Inspection Methods, – a State-of-the-Art Report, Pipeline Welding and – B.L. Jones, 31 to 36 (July).
Iridium Heat Source Capsules for Space Missions, Welding – W.R. Kanne, Jr., 17 to 22 (Aug).
*Iron Castings, Robotic Plasma Arc Speed-Cleans Gray – 65 to 66 (Nov).

Joint Tracking Device, Optiguide – A New Optical – P.-M. Gonseth and P. Blanc, 27 to 29 (Sept).

Laser and MIAB Welding Techniques, Advances in – K.I. Johnson, 15 to 20 (Feb).
Laser Beam Welding Facility for High Volume Production, Development of an Automated – J.A. Miller and J. Chevalier, 49 to 54 (July).
Laser Offers Key Economies in Heavy Section Welding – J. Weber, 23 to 26 (Feb).
*Laser/Robot Duo Produces Tank Engine Parts – 49 (Mar).
Laser Sensor, Development of a Two-Directional Seam Tracking System with – J.L. Pan, F.D. He, W.C. Chen, L.S. Gao, Q.H. Cao, M.S. Wu, and J.K. Wang, 28 to 31 (Feb).
*Lift Truck Forks, Transfer Machine Automates Preheat, Welding of – 53 (Aug).

*Magnetic Device Speeds Placement of Hull Plate Stiffeners – 52 (Aug).
*Magnets, Hydraulic Welding Fixture Helps Build Giant Accelerator – 51 (Dec).
*Measuring Weld Grinding Costs – Robert Pooles, 46 to 47 (Mar).
Metallurgical and Toughness Requirements for Transmission Tower Steels – E.R. Holby, 17 to 20 (April).
Methods for Economic Justification of an Arc Welding Robot Installation – V.J. Pavone, 40 to 46 (Nov).
MIAB Welding Techniques, Advances in Laser and – K.I. Johnson, 15 to 20 (Feb).

Narrow Gap Welding – Part I, The State-of-the-Art of – V.Y. Malin, 22 to 30 (May).
Narrow Gap Welding – Part II, The State-of-the-Art of – V.Y. Malin, 37 to 46 (June).
*NDT System Uses Fluorescent-Penetrant Inspection Method, Automated – 55 (Dec).
Newest Structural Technology Gets Spaceship Earth Off the Ground – A.C. Wilpon, 14 to 19 (June).

Optical Joint Tracking Device, Optiguide – A New – P.-M. Gonseth and P. Blanc, 27 to 29 (Sept).
Optiguide – A New Optical Joint Tracking Device – P.-M. Gonseth and P. Blanc, 27 to 29 (Sept).
Ozone during Welding of Copper-Base Alloys, Production and Control of – A. Ditschun and M. Sahoo, 41 to 46 (Aug).

*Pipe Cutting, Computer Technology Adds Productivity – 57 (July).
*Pipe Forming Costs, Cold Bender Cuts – 54 (Mar).
Pipeline Welding and Inspection Methods – a State-of-the-Art Report – B.L. Jones, 31 to 36 (July).
*Pipe Ready for Welding, Primer Keeps – 54 (Apr).
*Piping Connections, Don't Seal Weld Threaded – W.A. Bruce, 60 (July).
Pitting Corrosion of High Alloy Stainless Steel Weldments in Oxidizing Environments – A. Garner, 27 to 34 (Jan).
Plasma Surfacing – Is It Right For You?, The Switch to – G. Saltzman, 40 to 41 (May).
Positioning Errors in Your Robotic Arc Welding System, Understanding – L. Nissley, 30 to 37 (Nov).
Postheat in Repair Welding, The Importance of Preheat/ – R.M. Manning, 27 to 34 (May).
Power Transmission Poles, Design and Fabrication of – E.R. Holby, 29 to 34 (Aug).
*Precision Joining, Adaptive Welding System 'Calls the Shots' for – 47 to 48 (Jan).
Preheat/Postheat in Repair Welding, The Importance of – R.M. Manning, 27 to 34 (May).
*Preheat, Welding of Lift Truck Forks, Transfer Machine Automates – 53 (Aug).
*Primer Keeps Pipe Ready for Welding – 54 (April).
Production and Control of Ozone during Welding of Copper-Base Alloys – A. Ditschun and M. Sahoo, 41 to 46 (Aug).
Production, Development of an Automated Laser Beam Welding Facility for High Volume – J.A. Miller and J. Chevalier, 49 to 54 (July).
*Programmable Control Puts Precision in Automatic GTA Welding System – 63 to 64 (Nov).
*Programmed Hardfacing System Combats Wear – 44 (May).

Quality Control in Welding, A Real Time Approach to – D.R. Blackmon and F.W. Kearney, 37 to 39 (Aug).

Radial Friction Welding – E.D. Nicholas, 17 to 29 (July).
*Railcar Repair Shop Cuts Costs with Unique Installation of Welding Equipment – 51 (Aug).
Real Time Approach to Quality Control in Welding, A – D.R. Blackmon and F.W. Kearney, 37 to 39 (Aug).
Repair Method for Sodium Steam Heat Exchanger, An In-Place – G.E. Sheward and M. Baron, 39 to 47 (July).
Repair Welding, The Importance of Preheat/Postheat in – R.M. Manning, 27 to 34 (May).
Research and Development at Six European Laboratories, Current Welding – J.F. Key, 33 to 38 (Apr).
*Resistance Seam Welding, Flexible Controller Helps 'Turn the Corner' in – 68 to 69 (Nov).
*Resistance Welding Electrodes Do Their Own Part Holding – 43 (Feb).
Resistance Welding in the Electronics Industry, Automatic – A.G. Forbes, 55 to 56 (Nov).
*Robot Duo Produces Tank Engine Parts, Laser/ – 49 (Mar).
Robotic Arc Welding Application, Identification and Start-up of a Successful – J.H. Gage, 19 to 26 (Nov).
Robotic Arc Welding System, Understanding Positioning Errors in Your – L. Nissley, 30 to 37 (Nov).
*Robotic Plasma Arc Speed-Cleans Gray Iron Castings – 65 to 66 (Nov).
*Robotics, Welding Automation Experience Benefits Newcomer to – 67 (Nov).
*Robotic Welding Sensor Steers Self, Corrects Along the Way – 59 to 60 (Nov).

A Practical Welder article

Robot Installation, Methods for Economic Justification of an Arc Welding – V.J. Pavone, 40 to 46 (Nov).
*Robot Shines in Solar Cell Production, Traveling – 40 (Feb).
*Robot's Work Positions, Increases Accuracy and Efficiency, System Evaluates – 73 (Nov).
*Robot Takes Control of Tool Rebuilding Operation – 43 (May).

SAW Process, High Quality Large Components 'Shape Welded' by a – K. Kussmaul, F.-W. Schoch and H. Luckow, 17 to 24 (Sept).
Seal Weld Threaded Piping Connections, Don't – W.A. Bruce, 60 (July).
Seam Tracking System with Laser Sensor, Development of a Two-Directional – J.L. Pan, F.D. He, W.C. Chen, L.S. Gao, Q.H. Cao, M.S. Wu, and J.K. Wang, 28 to 31 (Feb).
Sensor Assemblies, Welding and Brazing of Film Probe – A.J. Moorhead, 17 to 27 (Oct).
*Sensor Steers Self, Corrects Along the Way, Robotic Welding – 59 to 60 (Nov).
*Seven Computer Controlled Presses Weld Alliance Underbody – 39 (Feb).
'Shape Welded' by a SAW Process, High Quality Large Components – K. Kussmaul, F.-W. Schoch and H. Luckow, 17 to 24 (Sept).
Sheet Steel Structures, Evaluation of GMA Spot Welding for Assembly of High Performance – W.P. Blankenship and R.P. Sprecace, 27 to 33 (Mar).
Shielded Metal Arc Weldments, The Structural Integrity of Copper-Nickel to Steel – S.M. Fisher, D. Frederick, M.R. Louthan, Jr., and J.H. Wilson, 37 to 43 (Mar).
*Small Compressor Casings Are Redesigned as Weldments – 49 (Sept).
Small Diameter, Flux Cored Electrodes, Economics of – C. Zimmerman and D. Schmerling, 41 to 44 (Apr).
Sodium Steam Heat Exchanger, An In-Place Repair Method for – G.E. Sheward and M. Baron, 39 to 47 (July).
*Solar Cell Production, Traveling Robot Shines in – 40 (Feb).
*Soldering Joins Complex Parts at Motorola, Raytheon, Vapor Phase Reflow, 60 (Oct).
Some Considerations for Fabrication of High Alloy Stainless Steels – J.M. Grocki, 21 to 25 (Jan).
South Africa, Education and Training in Welding Technology in a Developing Country – The Republic of – C. Smallbone, 22 to 34 (June).
Space Missions, Welding Iridium Heat Source Capsules for – W.R. Kanne, Jr., 17 to 22 (Aug).
*Specially Built Vehicles Aid with On-Site Welding Tasks – 53 (Dec).
Spot Welding for Assembly of High Performance Sheet Steel Structures, Evaluation of GMA – W.P. Blankenship and R.P. Sprecace, 27 to 33 (Mar).
Stainless Steels, Some Considerations for Fabrication of High Alloy – J.M. Grocki, 21 to 25 (Jan).
Stainless Steel Weldments in Oxidizing Environments, Pitting Corrosion of High Alloy – A. Garner, 27 to 34 (Jan).
State-of-the-Art of Narrow Gap Welding – Part I, The – V.Y. Malin, 22 to 30 (May).
State-of-the-Art of Narrow Gap Welding – Part II, The – V.Y. Malin, 37 to 46 (June).
Status of Welding Technology in the United States, The – J.H. Gross, 30 to 36 (Dec).
Steam Generator Nozzle Dam Insert Welding System – C.T. Harden, 33 to 37 (Feb).
Steel Shielded Metal Arc Weldments, The Structural Integrity of Copper-Nickel to – S.M. Fisher, D. Frederick, M.R. Louthan, Jr., and J.H. Wilson, 37 to 43 (Mar).
Step Brazing a Multi-Target TRAX – D.D. Berger, 41 to 43 (Oct).
Stress Corrosion Cracking in an Annealed 5083 Aluminum Alloy Weldment – D.N. Williams, 25 to 27 (Aug).
*Structural Beams, Welding Line Custom Tailors – 54 (Dec).
Structural Integrity of Copper-Nickel to Steel Shielded Metal Arc Weldments, The – S.M. Fisher, D. Frederick, M.R. Louthan, Jr., and J.H. Wilson, 37 to 43 (March).
Structural Technology Gets Spaceship Earth Off the Ground, Newest – A.C. Wilpon, 14 to 19 (June).
*Students, Unique Welding Program Caters to Special – J. Mottaz, 53 (Apr).
*Switch to Plasma Surfacing – Is It Right for You?, The – G. Saltzman, 40 to 41 (May).
*System Evaluates Robot's Work Positions, Increases Accuracy and Efficiency – 73 (Nov).
*System Hikes Production with Five Torch Automatic Welding – 72 (Nov).

*Tank Engine Parts, Laser/Robot Duo Produces – 49 (Mar).
*Tank Welds Receive One-Shot Heat Treatment, Caustic – 60 (June).
*Tapes Talks, Shares Knowledge, AWS Section – M. Marcus, 48 (June).
*Technology Adds Productivity to Pipe Cutting, Computer – 57 (July).
*Technology, A Distributor's Contribution to Welding – T.P. Schoonmaker, 49 to 51 (Apr).
Technology in the United States, The Status of Welding – J.H. Gross, 30 to 36 (Dec).
Thermocouples – Essential Devices for Proper Control of Local Weld Heat Treatment – F.C. Eller, Jr., 38 to 40 (Dec).
Titanium Filler Metal Wire, Development of Fabricated – T.J. Bosworth, C.W. Domby, R. Denale, and G.H. Macshane, 36 to 45 (Jan).
*Tool Rebuilding Operation, Robot Takes Control of – 43 (May).
Toughness Requirements for Transmission Tower Steels, Metallurgical and – E.R. Holby, 17 to 20 (April).
Training, Adding the "Negative" to Welder – E. Shifrin, 48 to 50 (Aug).
*Training Tour is Fond Homecoming for an AWS President – 62 to 63 (July).
Training Welding Hazard Awareness – E.G. Hornberger and T.R. Vann, 41 to 45 (Sept).
*Transfer Machine Automates Preheat, Welding of Lift Truck Forks – 53 (Aug).
Transmission Tower Steels, Metallurgical and Toughness Requirements for – E.R. Holby, 17 to 20 (Apr).
*Traveling Robot Shines in Solar Cell Production – 40 (Feb).
Two-Directional Seam Tracking System with Laser Sensor, Development of a – J.L. Pan, F.D. He, W.C. Chen, L.S. Gao, Q.H. Cao, M.S. Wu, and J.K. Wang, 28 to 31 (Feb).

Ultrasonic Examination of Weldments – C.J. Hellier, 33 to 39 (Sept).
Understanding Positioning Errors in Your Robotic Arc Welding System – L. Nissley, 30 to 37 (Nov).
*Unique Welding Program Caters to Special Students – Janet Mottaz, 53 (April).
Use of Fusion Welding Techniques in the Fabrication of a Superconducting Magnet Thermal Shield System – E.N.C. Dalder, J.H. Berkey, Y. Chang, G.L. Johnson, G.H. Lathrop, D.L. Podesta and J.H. Van Sant, 17 to 26 (Dec).

*Vacuum Heat Treating Equipment, Company Diversifies with – 44 (Feb).
*Vapor Phase Reflow Soldering Joins Complex Parts at Motorola, Raytheon, 60 (Oct).
*Vision System Spots, Corrects Improper Part Alignment – 58 (June).

A Practical Welder article

*Wear Problem, Flame Sprayed Coating Solves a Sticky – 42 (May).
*Welded Brass Tube Mill Offers Pluses in Auto Radiator Production – 52 (Sept).
Welding and Brazing of Film Probe Sensor Assemblies – A.J. Moorhead, 17 to 27 (Oct).
*Welding Automation Experience Benefits Newcomer to Robotics – 67 (Nov).
*Welding Booth Helps Maintain Race Cars, Equipment at Budweiser-Cleveland 500 – 61 to 62 (Nov).
*Welding Craftsmanship Helps Recapture the Past – 46 to 47 (April).
*Welding Fixture Helps Build Giant Accelerator Magnets, Hydraulic – 51 (Dec).
Welding Iridium Heat Source Capsules for Space Missions – W.R. Kanne, Jr., 17 to 22 (Aug).
*Welding Line Custom Tailors Structural Bases – 54 (Dec).
*Welding Machine Indexing Drive Moves Heavy Load with High Accuracy, 62 to 63 (Oct).
*Welding Tasks, Specially Built Vehicles Aid with On-Site – 53 (Dec).
Welding Technology in a Developing Country – The Republic of South Africa, Education and Training – C. Smallbone, 22 to 34 (June).
*Weld Repair Proves Strong Link in Blower Housing Assembly – 52 (Mar).
*What's Behind the Boom in Electronic Air Cleaning? – J.T. Ashe, 64 to 66 (Oct).

AUTHOR INDEX

Ashburn, L.L. – Furnace Design Considerations for Aluminum Brazing under Vacuum, 45 to 54 (Oct.)
Ashe, J.T. – What's Behind the Boom in Electronic Air Cleaning?, 64 to 66 (Oct).

Baron, M. and Sheward G.E. – An In-Place Repair Method for a Sodium-Steam Heat Exchanger, 39 to 47 (July).

Berger, D.D. – Step Brazing a Multi-Target TRAX, 41 to 43 (Oct).
Berkey, J.H., Dalder, E.N.C., Chang, Y., Johnson, G.L., Lathrop, G.H., Podesta, D.L., and Van Sant, J.H. – Use of Fusion Welding Techniques in the Fabrication of a Superconducting Magnet Thermal Shield System, 17 to 26 (Dec).
Blackmon, D.R. and Kearney, F.W. – A Real Time Approach to Quality Control in Welding, 37 to 39 (Aug).
Blanc, P. and Gonseth, P.-M. – Optiguide – A New Optical Joint Tracking Device, 27 to 29 (Sept).
Blankenship, W.P. and Sprecace, R.P. – Evaluation of GMA Spot Welding for Assembly of High Performance Sheet Steel Structures, 27 to 33 (Mar).
Bosworth, T.J., Domby, C.W., Denale, R., and Macshane, G.H. – Development of Fabricated Titanium Filler Metal Wire, 36 to 45 (Jan).
Bruce, W.A. – Don't Seal Weld Threaded Piping Connections, 60 (July).

Cao, Q.H., Wu, M.S., Wang, J.K., Pan, J.L., He, F.D., Chen, W.C., and Gao, L.S. – Development of a Two-Directional Seam Tracking System with Laser Sensor, 28 to 31 (Feb).
Chang, Y., Dalder, E.N.C., Berkey, J.H., Johnson, G.L., Lathrop, G.H., Podesta, D.L., and Van Sant, J.H. – Use of Fusion Welding Techniques in the Fabrication of a Superconducting Magnet Thermal Shield System, 17 to 26 (Dec).
Chavanne, R.L. – Forty-Four Ways to Improve Your Hardfacing Operation, 15 to 18 (May).
Chen, W.C., Gao, L.S., Cao, Q.H., Wu, M.S., Wang, J.K., Pan, J.L., and He, F.D. – Development of a Two-Directional Seam Tracking System with Laser Sensor, 28 to 31 (Feb).
Chevalier, J. and Miller, J.A. – Development of an Automated Laser Beam Welding Facility for High Volume Production, 49 to 54 (July).

Dalder, E.N.C., Berkey, J.H., Chang, Y., Johnson, G.L., Lathrop, G.H., Podesta, D.L., and Van Sant, J.H. – Use of Fusion Welding Techniques in the Fabrication of a Superconducting Magnet Thermal Shield System, 17 to 26 (Dec).
Denale, R., Macshane, G.H., Bosworth, T.J., and Domby, C.W. – Development of Fabricated Titanium Filler Metal Wire, 36 to 45 (Jan).
Dille, E.R. and Espy, R.H. – FGD Fabrication – An Opportunity for Excellence, 15 to 18 (Jan).
Ditschun, A. and Sahoo, M. – Production and Control of Ozone during Welding of Copper-Base Alloys, 41 to 46 (Aug).
Domby, C.W., Denale, R., Macshane, G.H., and Bosworth, T.J. – Development of Fabricated Titanium Filler Metal Wire, 36 to 45 (Jan).

Eller, Jr., F.C. – Thermocouples – Essential Devices for Proper Control of Local Weld Heat Treatment, 38 to 40 (Dec).
Espy, R.H. and Dille, E.R. – FGD Fabrication – An Opportunity for Excellence, 15 to 18 (Jan).

Fisher, S.M., Frederick, D., Louthan, Jr., M.R., and Wilson, J.H. – The Structural Integrity of Copper-Nickel to Steel Shielded Metal Arc Weldments, 37 to 43 (Mar).
Forbes, A.G. – Automatic Resistance Welding in the Electronics Industry, 55 to 56 (Nov).
Frederick, D., Louthan, Jr., M.R., Wilson, J.H., and Fisher, S.M. – The Structural Integrity of Copper-Nickel to Steel Shielded Metal Arc Weldments, 37 to 43 (Mar).

Gage, J.H. – Identification and Start-up of a Successful Robotic Arc Welding Application, 19 to 26 (Nov).
Gao, L.S., Cao, Q.H., Wu, M.S., Wang, J.K., Pan, J.L., He, F.D., and Chen, W.C. – Development of a Two-Directional Seam Tracking System with Laser Sensor, 28 to 31 (Feb).
Garner, A. – Pitting Corrosion of High Alloy Stainless Steel Weldments in Oxidizing Environments, 27 to 34 (Jan).
Gilani, M.H. – Hardfacing Helps in Grinding Tough Ferroalloys for Welding Electrode Industry, 36 to 38 (May).
Glynn, T.J. – Considerations in Automatic Welding System Design – Tools for Increased Welding Productivity, 48 to 53 (Nov).
Gonseth, P.-M. and Blanc, P. – Optiguide – A New Optical Joint Tracking Device, 27 to 29 (Sept).
Grocki, J.M. – Some Considerations for Fabrications of High Alloy Stainless Steels, 21 to 25 (Jan).
Gross, J.H. – The Status of Welding Technology in the United States, 30 to 36 (Dec).

Harden, C.T. – Steam Generator Nozzle Dam Insert Welding System, 33 to 37 (Feb).

Part 2—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Aging Response of a Welded Iron-Based Superalloy, The—M.J. Strum, L.T. Summers and J.W. Morris, Jr., 235-s to 242-s (Sept).

Alloy 800, An Investigation of Heat-Affected Zone Hot Cracking in—J.C. Lippold, 1-s to 11-s (Jan).

Aluminum Alloy 5456, Laser Beam Welding of—D.W. Moon and E.A. Metzbower, 53-s to 58-s (Feb).

Aluminum Alloys, Tensile and Toughness Properties of Arc-Welded 5083 and 6082—M.H. Scott and M.F. Gittos, 243-s to 252-s (Sept).

Aluminum Alloy Welded, Butt Joint and Fillet Welded Plates, Effects of GTA Dressing on the Fatigue Properties of—I.J. Polmear and D.R. Wilkinson, 78-s to 81-s (Mar).

Aluminum and Aluminum Alloys, Laser Welding of—C.A. Huntington and T.W. Eagar, 105-s to 107-s (Apr).

Aluminum-Containing Nickel-Base and Iron-Base Alloys During Brazing under Vacuum, Surface Reactions and Wetting Mechanisms of Titanium—E. Lugscheider, H. Zhuang and M. Maier, 295-s to 300-s (Oct).

Aluminum, Grain Boundary Penetration During Brazing of—D.J. Schmatz, 267-s to 271-s (Oct).

Arc Temperature Distribution, Process Variable Influence on—J.F. Key, J.W. Chan, and M.E. McIlwain, 179-s to 184-s (July).

Artificial Discontinuities, Fatigue Behavior of Welded Steel Butt Joints Containing—M.D. Bowman and W.H. Munse, 36-s to 44-s (Feb).

Austenitic Stainless Steel Sheets—Effects of Welding Parameters, Weld Defects in—V.P. Kujanpaa, 45-s to 52-s (Feb).

Austenitic Stainless Steel Weld Metal, Technical Note: Metallographic Sulphur Determination by SEM in—J.I. Morgenfeld, M. Solari and J. Ovejero-Garcia, 143-s to 146-s (May).

Austenitic Weld Metals, Hot Cracking Problems in Different Fully—G. Rabensteiner, J. Tosch and H. Schaereiter, 21-s to 27-s (Jan).

Blunt Flaws in Pipeline Girth Welds, Significance of—M.B. Kasen, 117-s to 122-s (May).

Bonds in Cold Welds, Mechanisms Producing Metallic—N. Bay, 137-s to 142-s (May).

Brazed Joints of Inconel 718, Effect of Strain Rate and Temperature on Yielding and Fracture Toughness of—B.Z. Weiss and B. Grushko, 282-s to 289-s (Oct).

Brazing of Aluminum, Grain Boundary Penetration During—D.J. Schmatz, 267-s to 271-s (Oct).

Brazing of Stainless Steel with Nickel-Base Filler Metals BNi-2, BNi-5 and BNi-7, High Temperature—E. Lugscheider and K.-D. Partz, 160-s to 164-s (June).

Brazing under Vacuum, Surface Reactions and Wetting Mechanisms of Titanium- and Aluminum-Containing Nickel-Base and Iron-Base Alloys During—E. Lugscheider, H. Zhuang and M. Maier, 295-s to 300-s (Oct).

Brazing, Wetting in Vacuum-Inert Gas Partial Pressure Atmosphere—A. Sakamoto, 272-s to 281-s (Oct).

Butt Joint, and Fillet Welded Plates, Effects of GTA Dressing on the Fatigue Properties of Aluminum Alloy Welded,—I.J. Polmear and D.R. Wilkinson, 78-s to 81-s (Mar).

Butt Joints Containing Artificial Discontinuities, Fatigue Behavior of Welded Steel—M.D. Bowman and W.H. Munse, 36-s to 44-s (Feb).

Carbon on the Microstructure and Properties of C-Mn All-Weld Metal Deposits, The Effect of—G.M. Evans, 313-s to 320-s (Nov).

Cast Iron, A Study of Heat-Affected Zone Structures in Ductile—R.C. Voigt and C.R. Loper, Jr., 82-s to 88-s (Mar).

Chemical Composition of Welding Fumes, Investigations on—M. Kobayashi, S. Maki, Y. Hashimoto, and T. Suga, 190-s to 196-s (July).

Cold Welds, Mechanisms Producing Metallic Bonds in—N. Bay, 137-s to 142-s (May).

Convection in Arc Weld Pools—G.M. Oreper, T.W. Eagar and J. Szekely, 307-s to 312-s (Nov).

Copper Joints, Effect of Long Term Elevated Temperature Aging on the Electrical Resistance of Soldered—W.J. Reichenecker, 290-s to 294-s (Oct).

Determination of Necessary Preheating Temperature in Steel Welding—N. Yurioka, S. Oshita and S. Saito, 147-s to 153-s (June).

Development of a Ferritic Consumable for Welding Grain-Refined Fe-12Ni-0.25Ti to Retain Toughness at 4.2K, The—H.J. Kim and J.W. Morris, Jr., 210-s to 219-s (Aug).

Diffusion Welding of Metals, A Theoretical Analysis of the Stability of Surface Oxides During—Z.A. Munir, 333-s to 336-s (Dec).

Dissimilar-Metal Welds, A Simple Test for—R.L. Klueh, J.F. King and J.L. Griffith, 154-s to 159-s (June).

Ductile Cast Iron, A Study of Heat-Affected Zone Structures in—R.C. Voigt and C.R. Loper, Jr., 82-s to 88-s (Mar).

Ductility and Toughness as Influenced by Inclusion Morphology, Friction Weld—B.J. Eberhard, B.W Schaaf, Jr., and A.D. Wilson, 171-s to 178-s (July).

Effect of Carbon on the Microstructure and Properties of C-Mn All-Weld Metal Deposits, The—G.M. Evans, 313-s to 320-s (Nov).

Effect of Long Term Elevated Temperature Aging on the Electrical Resistance of Soldered Copper Joints—W.J. Reichenecker, 290-s to 294-s (Oct).

Effect of Strain Rate and Temperature on Yielding and Fracture Toughness of Brazed Joints of Inconel 718—B.Z. Weiss and B. Grushko, 282-s to 289-s (Oct).

Effect of Welding Parameters, Weld Defects in Austenitic Stainless Steel Sheets—V.P. Kujanpaa, 45-s to 52-s (Feb).

Effects of Electrode Composition, Flux Basicity, and Slag Depth on Grain-Boundary Cracking in Electroslag Weld Metals—P.J. Konkol, 63-s to 71-s (Mar).

Effects of GTA Dressing on the Fatigue Properties of Aluminum Alloy Welded, Butt Jointed and Fillet Welded Plates—I.J. Polmear and D.R. Wilkinson, 78-s to 81-s (Mar).

Effects of Stress Relief on Microalloyed Weld Metal Impact Properties—C.H. Entrekin, 197-s to 203-s (Aug).

Electrochemical Evaluation of Sensitization, Technical Note: An—S.C. Tjong, J. Kepner and Z. Eliezer, 19-s to 20-s (Jan).

Electrode Composition, Flux Basicity, and Slag Depth on Grain-Boundary Cracking in Electroslag Weld Metals, Effects of—P.J. Konkol, 63-s to 71-s (Mar).

Electrode Welds, Hydrogen-Induced Cracking in Flux Cored—S. Lathabai and R.D. Stout, 59-s to 62-s (Mar).

Electron Beam Welds, Surface Active Elements Effects on the Shape of GTA, Laser, and—C.R. Heiple, J. Roper, R.T. Stagner and R.J. Aden, 72-s to 77-s (Mar).

Electroslag Weld Metal Composition on Hydrogen Cracking,

Influence of—R. Thibau and S.R. Bala, 97-s to 104-s (Apr).
Electroslag Weld Metals, Effects of Electrode Composition, Flux Basicity, and Slag Depth on Grain-Boundary in—P.J. Konkol, 63-s to 71-s (Mar).
Elements Effects on the Shape of GTA, Laser, and Electron Beam Welds, Surface Active—C.R. Heiple, J. Roper, R.T. Stagner and R.J. Aden, 72-s to 77-s (Mar).
Experimental Investigation of GTA Weld Pool Oscillations—R.J. Renwick and R.W. Richardson, 29-s to 35-s (Feb).
Experimental Investigation of the Forces Acting on a Drop of Weld Metal—J.H. Waszink and L.H.J. Graat, 108-s to 116-s (Apr).
An Extended Rosenthal Weld Model—A.C. Nunes, Jr., 165-s to 170-s (June).

Fabrications, Lamellar Tearing in Fillet Weldments of Pressure Vessel—A.D. Hattangadi and B.B. Seth, 89-s to 96-s (Apr).
Fatigue Behavior of Welded Steel Butt Joints Containing Artificial Discontinuities—M.D. Bowman and W.H. Munse, 36-s to 44-s (Feb).
Fatigue Properties of Aluminum Alloy Welded, Butt Joint and Fillet Welded Plates, Effects of GTA Dressing on the—I.J. Polmear and D.R. Wilkinson, 78-s to 81-s (Mar).
Ferrite Content Due to P and S, Variations in Weld—J.A. Brooks, A.W. Thompson, and J.C. Williams, 220-s to 225-s (Aug).
Ferritic Consumable for Welding Grain-Refined Fe-12Ni-0.25Ti to Retain Toughness at 4.2K, The Development of a—H.J. Kim and J.W. Morris, Jr., 210-s to 219-s (Aug).
Filler Metals BNi-2, BNi-5 and BNi-7, High Temperature Brazing of Stainless Steel with Nickel-Base—E. Lugscheider and K.-D. Partz, 160-s to 164-s (June).
Filler Metals of Low Precious Metal Content, Nickel Base—E. Lugscheider and H. Pelster, 261-s to 266-s (Oct).
Fillet Welded Plates, Effects of GTA Dressing on the Fatigue Properties of Aluminum Alloy Welded, Butt Joint, and—I.J. Polmear and D.R. Wilkinson, 78-s to 81-s (Mar).
Fillet Weldments of Pressure Vessel Fabrications, Lamellar Tearing in—A.D. Hattangadi and B.B. Seth, 89-s to 96-s (Apr).
Flux Basicity, and Slag Depth on Grain-Boundary Cracking in Electroslag Weld Metals, Effects of Electrode Composition—P.J. Konkol, 63-s to 71-s (Mar).
Flux Cored Electrode Welds, Hydrogen-Induced Cracking in—S. Lathbai and R.D. Stout, 59-s to 62-s (Mar).
Friction Weld Ductility and Toughness as Influenced by Inclusion Morphology—B.J. Eberhard, B.W. Schaaf, Jr., and A.D. Wilson, 171-s to 178-s (July).
Friction Welding of Austenitic Stainless Steels, Technical Note: Microstructural Evolution During Inertia—J.C. Lippold and B.C. Odegard, 361-s to 364-s (Dec).
Fumes, Investigations on Chemical Composition of Welding—M. Kobayashi, S. Maki, Y. Hashimoto, and T. Suga, 190-s to 196-s (July).

Girth Welds, Significance of Blunt Flaws in Pipeline—M.B. Kasen, 117-s to 122-s (May).
Grain-Boundary Cracking in Electroslag Weld Metals, Effects of Electrode Composition, Flux Basicity, and Slag Depth on—P.J. Konkol, 63-s to 71-s (Mar).
Grain Boundary Penetration During Brazing of Aluminum—D.J. Schmatz, 267-s to 271-s (Oct).
GTA Dressing on the Fatigue Properties of Aluminum Alloy Welded, Butt Joint and Fillet Welded Plates, Effects of—I.J. Polmear and D.R. Wilkinson, 78-s to 81-s (Mar).
GTA, Laser, and Electron Beam Welds, Surface Active Elements Effects on the Shape of—C.R. Heiple, J. Roper, R.T. Stagner and R.J. Aden, 72-s to 77-s (Mar).
GTA Weld Pool Oscillations, Experimental Investigation of—R.J. Renwick and R.W. Richardson, 29-s to 35-s (Feb).

Heat-Affected Zone Hot Cracking in Alloy 800, An Investigation—J.C. Lippold, 1-s to 11-s (Jan).
Heat-Affected Zone, "In-Situ" Determination of Transformation Temperatures in the Weld—R.H. Phillips, 12-s to 18-s (Jan).
Heat-Affected Zone Structures in Ductile Cast Iron, A Study of—R.C. Voigt and C.R. Loper, Jr., 82-s to 88-s (Mar).
High Temperature Brazing of Stainless Steel with Nickel-Base Filler Metals BNi-2, BNi-5 and BNi-7—E. Lugshieder and K.-D. Partz, 160-s to 164-s (June).
Hot Cracking in Alloy 800, An Investigation of Heat-Affected Zone—J.C. Lippold, 1-s to 11-s (Jan).
Hot Cracking Problems in Different Fully Austenitic Weld Metals—G. Rabensteiner, J. Tosch and H. Schaereiter, 21-s to 27-s (Jan).
Hydrogen Cracking, Influence of Electroslag Weld Metal Composition on— R. Thibau and S.R. Bala, 97-s to 104-s (Apr).
Hydrogen-Induced Cracking in Flux Cored Electrode Welds—S. Lathabai and R.D. Stout, 59-s to 62-s (Mar).

Inclusion Morphology, Friction Weld Ductility and Toughness as Influenced by—B.J. Eberhard, B.W. Schaaf, Jr., and A.D. Wilson, 171-s to 178-s (July).
Inclusions Found in Submerged Arc Weldments, Preliminary Observations of the Type, Shape and Distribution of—B.R. Keville, 253-s to 260-s (Sept).
Influence of Electroslag Weld Metal Composition on Hydrogen Cracking—R. Thibau and S.R. Bala, 97-s to 104-s (Apr).
The Influence of Nitrogen from Welding on Stainless Steel Weld Metal Microstructure—R.K. Okagawa, R.D. Dixon, and D.L. Olson, 204-s to 209-s (Aug).
Infrared Thermography for Sensing the Arc Welding Process—B.A. Chin, N.H. Madsen and J.S. Goodling, 227-s to 234-s (Sept).
"In-Situ" Determination of Transformation Temperatures in the Weld Heat-Affected Zone—R.H. Phillips, 12-s to 18-s (Jan).
Investigation of Heat-Affected Zone Hot Cracking in Alloy 800, An—J.C. Lippold, 1-s to 11-s (Jan).
Investigations on Chemicl Composition of Welding Fumes—M. Kobayashi, S. Maki, Y. Hashimoto, and T. Suga, 190-s to 196-s (July).
Iron-Based Superalloy, The Aging Response of a Welded—M.J. Strum, L.T. Summers and J.W. Morris, Jr., 235-s to 242-s (Sept).

Lamellar Tearing in Fillet Weldments of Pressure Vessel Fabrications—A.D. Hattangadi and B.B. Seth, 89-s to 96-s (Apr).
Lamellar Tears, The Toughness and Fatigue Strength of Welded Joints with Buried—E.J. Kaufmann and R.D. Stout, 301-s to 306-s (Nov).
Laser, and Electron Beam Welds, Surface Active Elements Effects on the Shape of GTA,—C.R. Heiple, J. Roper, R.T. Stagner and R.J. Aden, 72-s to 77-s (Mar).
Laser Beam Welding of Aluminum Alloy 5456—D.W. Moon and E.A. Metzbower, 53-s to 58-s (Feb).
Laser Welding of Aluminum and Aluminum Alloys—C.A. Huntington and T.W. Eagar, 105-s to 107-s (Apr).
Low-Carbon, Copper-Strengthened Alloy Steel, Submerged Arc Welding a—R.J. Jesseman and G.C. Schmid, 321-s to 330-s (Nov).
Low Carbon Steel Welds, Prevention of Solidification Cracking in Very—S. Oshita, N. Yurioka, N. Mori and T. Kimura, 129-s to 136-s (May).

Mechanisms of Power Dissipation in the Column of High Pressure Argon-Tungsten Arcs—C.J. Allum, 356-s to 360-s (Dec).
Mechanisms Producing Metallic Bonds in Cold Welding—N. Bay, 137-s to 142-s (May).

Metallic Bonds in Cold Welds, Mechanisms Producing – N. Bay, 137-s to 142-s (May).
Metallographic Sulphur Determination by SEM in Austenitic Stainless Steel Weld Metal, Technical Note: – J.I. Morgenfeld, M. Solari and J. Ovejero-Garcia, 143-s to 146-s (May).
Metallurgical Actions, Prevention of Temper Embrittlement in 2¼ Cr-1 MO Weld Metal by – J. Grosse-Wordemann and S. Dittrich, 123-s to 128-s (May).
Microalloyed Weld Metal Impact Properties, Effect of Stress Relief on – C.H. Entrekin, 197-s to 203-s (Aug).
Microstructural Evolution in the HAZ of Inconel 718 and Correlation with the Hot Ductility Test – R.G. Thompson and S. Genculu, 337-s to 345-s (Dec).
Microstructure, The Influence of Nitrogen on Stainless Steel Weld Metal – R.K. Okagawa, R.D. Dixon, and D.L. Olson, 204-s to 209-s (Aug).

Nickel-Base Filler Metals BNi-2, BNi-5 and BNi-7, High Temperature Brazing of Stainless Steel with – E. Lugscheider and K.-D. Partz, 160-s to 164-s (June).
Nickel Base Filler Metals of Low Precious Metal Content – E. Lugscheider and H. Pelster, 261-s to 266-s (Oct).
Nitrogen from Welding on Stainless Steel Weld Metal Microstructure, The Influence of – R.K. Okagawa, R.D. Dixon, and D.L. Olson, 204-s to 209-s (Aug).

Oscillations, Experimental Investigation of GTA Weld Pool – R.J. Renwick and R.W. Richardson, 29-s to 35-s (Feb).

Pipeline Girth Welds, Significance of Blunt Flaws in – M.B. Kasen, 117-s to 122-s (May).
Preheating Temperature in Steel Welding, Determination of Necessary – N. Yurioka, S. Oshita and S. Saito, 147-s to 153-s (June).
Preliminary Observations of the Type, Shape and Distribution of Inclusions Found in Submerged Arc Weldments – B.R. Keville, 253-s to 260-s (Sept).
Pressure Vessel Fabrications, Lamellar Tearing in Fillet Weldments of – A.D. Hattangadi and B.B. Seth, 89-s to 96-s (Apr).
Prevention of Solidification Cracking in Very Low Carbon Steel Welds – S. Oshita, N. Yurioka, N. Mori and T. Kimura, 129-s to 136-s (May).
Prevention of Temper Embrittlement in 2¼ Cr-1 Mo Weld Metal by Metallurgical Actions – J. Grosse-Wordemann and S. Dittrich, 123-s to 128-s (May).
Process Variable Influence on Arc Temperature Distribution – J.F. Key, J.W. Chan, and M.E. McIlwain, 179-s to 184-s (July).

Resistance Welds, Signature Analysis of Contact Voltage of – S.P. Owusu-Ofori and S.M. Wu, 185-s to 189-s (July).
Rosenthal Weld Model, An Extended – A.C. Nunes, Jr., 165-s to 170-s (June).

SEM in Austenitic Stainless Steel Weld Metal, Technical Note: Metallographic Sulphur Determination by – J.I. Morgenfeld, M. Solari and J. Ovejero-Garcia, 143-s to 146-s (May).
Sensitization, Technical Note: An Electrochemical Evaluation of – S.C. Tjong, J. Kepner and Z. Eliezer, 19-s to 20-s (Jan).
Signature Analysis of Contact Voltage of Resistance Welds – S.P. Owusu-Ofori and S.M. Wu, 185-s to 189-s (July).
Significance of Blunt Flaws in Pipeline Girth Welds – M.B. Kasen, 117-s to 122-s (May).
A Simple Test for Dissimilar-Metal Welds – R.L. Klueh, J.F. King and J.L. Griffith, 154-s to 159-s (June).
Slag Depth on Grain-Boundary Cracking in Electroslag Weld Metals, Effects of Electrode Composition, Flux Basicity, and – P.J. Konkol, 63-s to 71-s (Mar).
Soldered Copper Joints, Effect of Long Term Elevated Temperature Aging on the Electrical Resistance of – W.J. Reichenecker, 290-s to 294-s (Oct).
Solidification Cracking in Very Low Carbon Steel Welds, Prevention of – S. Oshita, N. Yurioka, N. Mori and T. Kimura, 129-s to 136-s (May).
Stainless Steels, Technical Note: Microstructural Evolution During Inertia Friction Welding of Austenitic – J.C. Lippold and B.C. Odegard, 361-s to 364-s (Dec).
Stainless Steel Weld Metal Microstructure, The Influence of Nitrogen from Welding on – R.K. Okagawa, R.D. Dixon, and D.L. Olson, 204-s to 209-s (Aug).
Stainless Steel with Nickel-Base Metals BNi-2, BNi-5 and BNi-7, High Temperature Brazing of – E. Lugscheider and K.-D. Partz, 160-s to 164-s (June).
Steel Welding, Determination of Necessary Preheating Temperature in – N. Yurioka, S. Oshita and S. Saito, 147-s to 153-s (June).
Steel Welds, Prevention of Solidification Cracking in Very Low Carbon – S. Oshita, N. Yurioka, N. Mori and T. Kimura, 129-s to 136-s (May).
Stress Relief on Microalloyed Weld Metal Impact Properties, Effect of – C.H. Entrekin, 197-s to 203-s (Aug).
Study of Heat-Affected Zone Structures in Ductile Cast Iron, A – R.C. Voigt and C.R. Loper, Jr., 82-s to 88-s (Mar).
Submerged Arc Welding a Low-Carbon, Copper-Strengthened Alloy Steel – R.J. Jesseman and G.C. Schmid, 321-s to 330-s (Nov).
Submerged Arc Weldments, Preliminary Observations of the Type, Shape and Distribution of Inclusions Found in – B.R. Keville, 253-s to 260-s (Sept).
Sulphur Determination by SEM in Austenitic Stainless Steel Weld Metal, Technical Note: Metallographic – J.I. Morgenfeld, M. Solari and J. Ovejero-Garcia, 143-s to 146-s (May).
Superalloy, The Aging Response of a Welded Iron-Based – M.J. Strum, L.T. Summers and J.W. Morris, Jr., 235-s to 242-s (Sept).
Surface Active Elements Effects on the Shape of GTA, Laser, and Electron Beam Welds – C.R. Heiple, J. Roper, R.T. Stagner and R.J. Aden, 72-s to 77-s (Mar).
Surface Reactions and Wetting Mechanisms of Titanium- and Aluminum-Containing Nickel-Base and Iron-Base Alloys During Brazing under Vacuum – E. Lugscheider, H. Zhuang and M. Maier, 295-s to 300-s (Oct).

Technical Note: An Electrochemical Evaluation of Sensitization – S.C. Tjong, J. Kepner and Z. Eliezer, 19-s to 20-s (Jan).
Technical Note: Metallographic Sulphur Determination by SEM in Austenitic Stainless Steel Weld Metal – J.I. Morgenfeld, M. Solari and J. Ovejero-Garcia, 143-s to 146-s (May).
Technical Note: Microstructural Evolution During Inertia Friction Welding of Austenitic Stainless Steels – J.C. Lippold and B.C. Odegard, 361-s to 364-s (Dec).
Temperature Brazing of Stainless Steel with Nickel-Base Filler Metals BNi-2, BNi-5 and BNi-7, High – E. Lugscheider and K.-D. Partz, 160-s to 164-s (June).
Temperature Distribution, Process Variable Influence on Arc – J.F. Key, J.W. Chan, and M.E. McIlwain, 179-s to 184-s (July).
Temperature Fields Produced by Traveling Distributed Heat Sources – T.W. Eagar and N.-S. Tsai, 346-s to 355-s (Dec).
Temperature in Steel Welding, Determination of Necessary Preheating – N. Yurioka, S. Oshita and S. Saito, 147-s to 153-s (June).
Temperatures in the Weld Heat-Affected Zone, "In-Situ" Determination of Transformation – R.H. Phillips, 12-s to 18-s (Jan).
Temper Embrittlement in 2¼ Cr-1 MO Weld Metal by Metallurgical Actions, Prevention of – J. Grosse-Wordemann and S. Dittrich, 123-s to 128-s (May).
Tensile and Toughness Properties of Arc-Welded 5083 and 6082 Aluminum Alloys – M.H. Scott and M.F. Gittos, 243-s

to 252-s (Sept).
Test for Dissimilar-Metal Welds, A Simple – R.L. Klueh, J.F. King and J.L. Griffith, 154-s to 159-s (June).
A Theoretical Analysis of the Stability of Surface Oxides During Diffusion Welding of Metals – Z.A. Munir, 333-s to 336-s (Dec).
Thermography for Sensing the Arc Welding Process, Infrared – B.A. Chin, N.H. Madsen and J.S. Goodling, 227-s to 234-s (Sept).
Titanium- and Aluminum-Containing Nickel-Base and Iron-Base Alloys During Brazing under Vacuum, Surface Reactions and Wetting Mechanisms of – E. Lugscheider, H. Zhuang and M. Maier, 295-s to 300-s (Oct).
The Toughness and Fatigue Strength of Welded Joints with Buried Lamellar Tears – E.J. Kaufmann and R.D. Stout, 301-s to 306-s (Nov).
Toughness as Influenced by Inclusion Morphology, Friction Weld Ductility and – B.J. Eberhard, B.W. Schaaf, Jr., and A.D. Wilson, 171-s to 178-s (July).
Toughness at 4.2K, The Development of a Ferritic Consumable for Welding Grain-Refined Fe-12Ni-0.25Ti to Retain – H.J. Kim and J.W. Morris, Jr., 210-s to 219-s (Aug).
Toughness Properties of Arc-Welded 5083 and 6082 Aluminum Alloys, Tensile and – M.H. Scott and M.F. Gittos, 243-s to 252-s (Sept).
Transformation Temperatures in the Weld Heat-Affected Zone, "In-Situ" Determination of – R.H. Phillips, 12-s to 18-s (Jan).
Variations in Weld Ferrite Content Due to P and S – J.A. Brooks, A.W. Thompson, and J.C. Williams, 220-s to 225-s (Aug).
Voltage of Resistance Welds, Signature Analysis of Contact – S.P. Owusu-Ofori and S.M. Wu, 185-s to 189-s (July).

Weld Defects in Austenitic Stainless Steel Sheets – Effect of Welding Parameters – V.P. Kujanpaa, 45-s to 52-s (Feb).
Welded Steel Butt Joint Containing Artificial Discontinuities, Fatigue Behavior of – M.D. Bowman and W.H. Munse, 36-s to 44-s (Feb).
Welding Parameters, Weld Defects in Austenitic Stainless Steel Sheets – Effects of – V.P. Kujanpaa, 45-s to 52-s (Feb).
Weld Metal, Experimental Investigation of the Forces Acting on a Drop of – J.H. Waszink and L.H.J. Graat, 108-s to 116-s (Apr).
Weld Pool Oscillations, Experimental Investigation of GTA – R.J. Renwick and R.W. Richardson, 29-s to 35-s (Feb).
Wetting in Vacuum-Inert Gas Partial Pressure Atmosphere Brazing – A. Sakamoto, 272-s to 281-s (Oct).
Wetting Mechanisms of Titanium- and Aluminum-Containing Nickel-Base and Iron-Base Alloys During Brazing under Vacuum, Surface Reactions and – E. Lugscheider, H. Zhuang and M. Maier, 295-s to 300-s (Oct).

Zone Structures in Ductile Cast Iron, A Study of Heat-Affected – R.C. Voigt and C.R. Loper, Jr., 82-s to 88-s (Mar).

AUTHOR INDEX

Aden, R.J., Heiple, C.R., Roper, J. and Stagner, R.T. – Surface Active Elements Effects on the Shape of GTA, Laser, and Electron Beam Welds, 72-s to 77-s (Mar).
Allum, C.J. – Mechanisms of Power Dissipation in the Column of High Pressure Argon-Tungsten Arcs, 356-s to 360-s (Dec).

Bala, S.R. and Thibau, R. – Influence of Electroslag Weld Metal Composition on Hydrogen Cracking, 97-s to 104-s (Apr).
Bay, N. – Mechanisms Producing Metallic Bonds in Cold Welding, 137-s to 142-s (May).
Bowman, M.D. and Munse, W.H. – Fatigue Behavior of Welded Steel Butt Joints Containing Artificial Discontinuities, 36-s to 44-s (Feb).
Brooks, J.A., Thompson, A.W., and Williams, J.C. – Variations in Weld Ferrite Content Due to P and S, 220-s to 226-s (Aug).

Chan, J.W., McIlwain, M.E., and Key, J.F. – Process Variable Influence on Arc Temperature Distribution, 179-s to 184-s (Jul).
Chin, B.A., Madsen, N.H. and Goodling, J.S. – Infrared Thermography for Sensing the Arc Welding Process, 227-s to 234-s (Sept).

Dittrich, S. and Grosse-Wordemann, J. – Prevention of Temper Embrittlement in 2¼ Cr-1 Mo Weld Metal by Metallurgical Actions, 123-s to 128-s (May).
Dixon, R.D., Olson, D.L., and Okagawa, R.K. – The Influence of Nitrogen from Welding on Stainless Steel Weld Metal Microstructure, 204-s to 209-s (Aug).

Eagar, T.W. and Huntington, C.A. – Laser Welding of Aluminum and Aluminum Alloys, 105-s to 107-s (Apr).
Eagar, T.W. and Tsai, N.-S. – Temperature Fields Produced by Traveling Distributed Heat Sources, 346-s to 355-s (Dec).
Eagar, T.W., Oreper, G.M. and Szekely, J. – Convection in Arc Weld Pools, 307-s to 312-s (Nov).
Eberhard, B.J., Schaaf, Jr., B.W., and Wilson, A.D. – Friction Weld Ductility and Toughness as Influenced by Inclusion Morphology, 171-s to 178-s (Jul).
Eliezer, Z., Tjong, S.C. and Kepner, J. – Technical Note: An Electrochemical Evaluation of Sensitization, 19-s to 20-s (Jan).
Entrekin, C.H. – Effect of Stress Relief on Microalloyed Weld Metal Impact Properties, 197-s to 203-s (Aug).
Evans, G.M. – The Effect of Carbon on the Microstructure and Properties of C-Mn All-Weld Metal Deposits, 313-s to 320-s (Nov).

Genculu, S. and Thompson, R.G. – Microstructural Evolution in the HAZ of Inconel 718 and Correlation with the Hot Ductility Test, 337-s to 345-s (Dec).
Gittos, M.F. and Scott, M.H. – Tensile and Toughness Properties of Arc-Welded 5083 and 6082 Aluminum Alloys, 243-s to 252-s (Sept).
Goodling, J.S., Chin, B.A. and N.H. Madsen – Infrared Thermography for Sensing the Arc Welding Process, 227-s to 234-s (Sept).
Graat, L.H.J. and Waszink, J.H. – Experimental Investigation of the Forces Acting on a Drop of Weld Metal, 108-s to 116-s (Apr).
Griffith, J.L., Klueh, R.L. and King, J.F. – A Simple Test for Dissimilar-Metal Welds, 154-s to 159-s (June).
Grosse-Wordemann, J. and Dittrich, S. – Prevention of Temper Embrittlement in 2¼ Cr-1 Mo Weld Metal by Metallurgical Actions, 123-s to 128-s (May).
Grushko, B. and Weiss, B.Z. – Effect of Strain Rate and Temperature on Yielding and Fracture Toughness of Brazed Joints of Inconel 718, 282-s to 289-s (Oct).

Hashimoto, Y., Suga, T., Kobayashi, M., and Maki, S. – Investigations on Chemical Composition of Welding Fumes, 190-s to 196-s (Jul).
Hattangadi, A.D., and Seth, B.B. – Lamellar Tearing in Fillet

Weldments of Pressure Vessel Fabrications, 89-s to 96-s (Apr).
Heiple, C.R., Roper, J., Stagner, R.T. and Aden, R.J. – Surface Active Elements Effects on the Shape of GTA, Laser, and Electron Beam Welds, 72-s to 77-s (Mar).

Jesseman, R.J. and Schmid, G.C. – Submerged Arc Welding a Low-Carbon, Copper-Strengthened Alloy Steel, 321-s to 330-s (Nov).

Kasen, M.B. – Significance of Blunt Flaws in Pipeline Girth Welds, 117-s to 122-s (May).
Kaufmann, E.J. and Stout, R.D. – The Toughness and Fatigue Strength of Welded Joints with Buried Lamellar Tears, 301-s to 306-s (Nov).
Kepner, J., Eliezer, Z. and Tjong, S.C. – Technical Note: An Electrochemical Evaluation of Sensitization, 19-s to 20-s (Jan).
Keville, B.R. – Preliminary Observations of the Type, Shape and Distribution of Inclusions Found in Submerged Arc Weldments, 253-s to 260-s (Sept).
Key, J.F., Chan, J.W., and McIlwain, M.E. – Process Variable Influence on Arc Temperature Distribution, 179-s to 184-s (Jul).
Kim, H.K. and Morris, Jr., J.W. – The Development of a Ferritic Consumable for Welding Grain-Refined Fe12Ni-0.25Ti to Retain Toughness at 4.2 K, 210-s to 219-s (Aug).
Kimura, T., Oshita, S., Yurioka, N., and Mori, N. – Prevention of Solidification Cracking in Very Low Carbon Steel Welds, 129-s to 136-s (May).
King, J.F., Griffith, J.L. and Klueh, R.L. – A Simple Test for Dissimilar-Metal Welds, 154-s to 159-s (June).
Klueh, R.L., King, J.F. and Griffith, J.L. – A Simple Test for Dissimilar-Metal Welds, 154-s to 159-s (June).
Kobayashi, M., Maki, S., Hashimoto, Y., and Suga, T. – Investigations on Chemical Composition of Welding Fumes, 190-s to 196-s (Jul).
Konkol, P.J. – Effects of Electrode Composition, Flux Basicity, and Slag Depth on Grain-Boundary Cracking in Electroslag Weld Metals, 63-s to 71-s (Mar).
Kujanpaa, V.P. – Weld Defects in Austenitic Stainless Steel Sheets – Effect of Welding Parameters, 45-s to 52-s (Feb).

Lathabai, S. and Stout, R.D. – Hydrogen-Induced Cracking in Flux Cored Electrode Welds, 58-s to 62-s (Mar).
Lippold, J.C. – An Investigation of Heat-Affected Zone Hot Cracking in Alloy 800, 1-s to 11-s (Jan).
Lippold, J.C. and Odegard, B.C. – Technical Note: Microstructural Evolution During Inertia Friction Welding of Austenitic Stainless Steels, 361-s to 364-s (Dec).
Loper, Jr., C.R. and Voigt, R.C. – A Study of Heat-Affected Zone Structures in Ductile Cast Iron, 82-s to 88-s (Mar).
Lugscheider, E. and Partz, K.-D. – High Temperature Brazing of Stainless Steel with Nickel-Base Filler Metals BNi-2, BNi-5 and BNi-7, 160-s to 164-s (June).
Lugscheider, E. and Pelster, H. – Nickel Base Filler Metals of Low Precious Metal Content, 261-s to 266-s (Oct).
Lugscheider, E., Zhuang, H. and Maier, M. – Surface Reactions and Wetting Mechanisms of Titanium- and Aluminum-Containing Nickel-Base and Iron-Base Alloys During Brazing under Vacuum, 295-s to 300-s (Oct).

Madsen, N.H., Chin, B.A. and Goodling, J.S. – Infrared Thermography for Sensing the Arc Welding Process, 227-s to 234-s (Sept).
Maier, M., Lugscheider, E. and Zhuang, H. – Surface Reactions and Wetting Mechanisms of Titanium- and Aluminum-Containing Nickel-Base and Iron-Base Alloys During Brazing under Vacuum, 295-s to 300-s (Oct).
Maki, S., Hashimoto, Y., Suga, T., and Kobayashi, M. – Investigations on Chemical Composition of Welding Fumes, 190-s to 196-s (Jul).
McIlwain, M.E., Key, J.F., and Chan, J.W. – Process Variable Influence on Arc Temperature Distribution, 179-s to 184-s (Jul).
Metzbower, E.A. and Moon, D.W. – Laser Beam Welding of Aluminum Alloy 5456, 53-s to 58-s (Feb).
Moon, D.W. and Metzbower, E.A. – Laser Beam Welding of Aluminum Alloy 5456, 54-s to 58-s (Feb).
Morgenfeld, J.I., Solari, M. and Ovejero-Garcia, J. – Technical Note: Metallographic Sulphur Determination by SEM in Austenitic Stainless Steel Weld Metal, 143-s to 146-s (May).
Mori, N., Kimura, T., Oshita, S. and Yurioka, N. – Prevention of Solidification Cracking in Very Low Carbon Steel Welds, 129-s to 136-s (May).
Morris, Jr., J.W. and Kim, H.K. – The Development of a Ferritic Consumable for Welding Grain-Refined Fe12Ni-0.25Ti to Retain Toughness at 4.2 K, 210-s to 219-s (Aug.)
Morris, Jr., J.W., Strum, M.J. and Summers, L.T. – The Aging Response of a Welded Iron-Based Superalloy, 235-s to 242-s (Sept).
Munir, Z.A. – A Theoretical Analysis of the Stability of Surface Oxides During Diffusion Welding of Metals, 333-s to 336-s (Dec).
Munse, W.H. and Bowman, M.D. – Fatigue Behavior of Welded Steel Butt Joints Containing Artificial Discontinuities, 36-s to 44-s (Feb).

Nunes, Jr., A.C. – An Extended Rosenthal Weld Model, 165-s to 170-s (June).

Odegard, B.C. and Lippold, J.C. – Technical Note: Microstructural Evolution During Inertia Friction Welding of Austenitic Stainless Steels, 361-s to 364-s (Dec).
Okagawa, R.K., Dixon, R.D., and Olson, D.L. – The Influence of Nitrogen from Welding on Stainless Steel Weld Metal Microstructure, 204-s to 209-s (Aug).
Olson, D.L., Okagawa, R.K., and Dixon, R.D. – The Influence of Nitrogen from Welding on Stainless Steel Weld Metal Microstructure, 204-s to 209-s (Aug).
Oreper, G.M., Eagar, T.W. and Szekely, J. – Convection in Arc Weld Pools, 307-s to 312-s (Nov).
Oshita, S., Saito, S. and Yurioka, N. – Determination of Necessary Preheating Temperature in Steel Welding, 147-s to 153-s (June).
Oshita, S., Yurioka, N., Mori, N. and Kimura, T. – Prevention of Solidification Cracking in Very Low Carbon Steel Welds, 129-s to 136-s (May).
Ovejero-Garcia, J., Morgenfeld, J.I. and Solari, M. – Technical Note: Metallographic Sulphur Determination by SEM in Austenitic Stainless Steel Weld Metal, 143-s to 146-s (May).
Owusu-Ofori, S.P. and Wu, S.M. – Signature Analysis of Contact Voltage of Resistance Welds, 185-s to 189-s (Jul).

Partz, K.-D. and Lugscheider, E. – High Temperature Brazing of Stainless Steel with Nickel-Base Filler Metals BNi-2, BNi-5 and BNi-7, 160-s to 164-s (June).
Pelster, H. and Lugscheider, E. – Nickel Base Filler Metals of Low Precious Metal Content, 261-s to 266-s (Oct).
Phillips, R.H. – "In-Situ" Determination of Transformation Temperatures in the Weld Heat-Affected Zone, 12-s to 18-s (Jan).
Polmear, I.J. and Wilkinson, D.R. – Effects of GTA Dressing on the Fatigue Properties of Aluminum Alloy Welded, Butt Joint and Fillet Welded Plates, 78-s to 81-s (Mar).

Rabensteiner, G., Tosch, J. and Schaereiter, H. – Hot Cracking Problems in Different Fully Austenitic Weld Metals, 21-s to 27-s (Jan).

Reichenecker, W.J. – Effect of Long Term Elevated Temperature Aging on the Electrical Resistance of Soldered Copper Joints, 290-s to 294-s (Oct).
Renwick, R.J. and Richardson, R.W. – Experimental Investigation of GTA Weld Pool Oscillations, 29-s to 35-s (Feb).
Richardson, R.W. and Renwick, R.J. – Experimental Investigation of GTA Weld Pool Oscillations, 29-s to 35-s (Mar).
Roper, J., Stagner, R.T., Aden, R.J. and Heiple, C.R. – Surface Active Elements Effects on the Shape of GTA, Laser, and Electron Beam Welds, 72-s to 77-s (Mar).

Saito, S., Yurioka, N. and Oshita, S. – Determination of Necessary Preheating Temperature in Steel Welding, 147-s to 153-s (June).
Sakamoto, A. – Wetting in Vacuum-Inert Gas Partial Pressure Atmosphere Brazing, 272-s to 281-s (Oct).
Schaaf, Jr., B.W., Wilson, A.D., and Eberhard, B.J. – Friction Weld Ductility and Toughness as Influenced by Inclusion Morphology, 171-s to 178-s (Jul).
Schaereiter, H., Rabensteiner, G. and Tosch, J. – Hot Cracking Problems in Different Fully Austenitic Weld Metals, 21-s to 27-s (Jan).
Schmatz, D.J. – Grain Boundary Penetration During Brazing of Aluminum, 267-s to 271-s (Oct).
Schmid, G.C. and Jesseman, R.J. – Submerged Arc Welding a Low-Carbon, Copper-Strengthened Alloy Steel, 321-s to 330-s (Nov).
Scott, M.H. and Gittos, M.F. – Tensile and Toughness Properties of Arc-Welded 5083 and 6082 Aluminum Alloys, 243-s to 252-s (Sept).
Seth, B.B. and Hattangadi, A.D. – Lamellar Tearing in Fillet Weldments of Pressure Vessel Fabrications, 89-s to 96-s (Apr).
Solari, M., Ovejero-Garcia, J. and Morgenfeld, J.I. – Technical Note: Metallographic Sulphur Determination by SEM in Austenitic Stainless Steel Weld Metal, 143-s to 146-s (May).
Stagner, R.T., Aden, R.J., Heiple, C.R. and Roper, J. – Surface Active Elements Effects on the Shape of GTA, Laser, and Electron Beam Welds, 72-s to 77-s (Mar).
Stout, R.D. and Kaufmann, E.J. – The Toughness and Fatigue Strength of Welded Joints with Buried Lamellar Tears, 301-s to 306-s (Nov).
Stout, R.D. and Lathabai, S. – Hydrogen-Induced Cracking in Flux Cored Electrode Welds, 58-s to 62-s (Mar).
Strum, M.J., Summers, L.T. and Morris, Jr., J.W. – The Aging Response of a Welded Iron-Based Superalloy, 235-s to 242-s (Sept).
Suga, T., Kobayashi, M., Maki, S., and Hashimoto, Y. – Investigations on Chemical Composition of Welding Fumes, 190-s to 196-s (Jul).
Summers, L.T., Strum, M.J. and Morris, Jr., J.W. – The Aging Response of a Welded Iron-Based Superalloy, 235-s to 242-s (Sept).
Szekely, J., Oreper, G.M. and Eagar, T.W. – Convection in Arc Weld Pools, 307-s to 312-s (Nov).

Thibau, R. and Bala, S.R. – Influence of Electroslag Weld Metal Composition on Hydrogen Cracking, 97-s to 104-s (Apr).
Thompson, A.W., Williams, J.C., and Brooks, J.A. – Variations in Weld Ferrite Content Due to P and S, 220-s to 226-s (Aug).
Thompson, R.G. and Genculu, S. – Microstructural Evolution in the HAZ of Inconel 718 and Correlation with the Hot Ductility Test, 337-s to 345-s (Dec).
Tjong, S.C., Kepner, J. and Eliezer, Z. – Technical Note: An Electrochemical Evaluation of Sensitization, 19-s to 20-s (Jan).
Tosch, J., Schaereiter, H. and Rabensteiner, G. – Hot Cracking Problems in Different Fully Austenitic Weld Metals, 21-s to 27-s (Jan).
Tsai, N.-S and Eagar, T.W. – Temperature Fields Produced by Traveling Distributed Heat Sources, 346-s to 355-s (Dec).

Voigt, R.C. and Loper, Jr., C.R. – A Study of Heat-Affected Zone Structures in Ductile Cast Iron, 82-s to 88-s (Mar).

Waszink, J.H. and Graat, J.H.J. – Experimental Investigation of the Forces Acting on a Drop of Weld Metal, 108-s to 116-s (Apr).
Weiss, B.Z. and Grushko, B. – Effect of Strain Rate and Temperature on Yielding and Fracture Toughness of Brazed Joints of Inconel 718, 282-s to 289-s (Oct).
Wilkinson, D.R. and Polmear, I.J. – Effects of GTA Dressing on the Fatigue Properties of Aluminum Alloy Welded, Butt Joint and Fillet Welded Plates, 78-s to 81-s (Mar).
Williams, J.C., Brooks, J.A., and Thompson, A.W. – Variations in Weld Ferrite Content Due to P and S, 220-s to 226-s (Aug).
Wilson, A.D., Eberhard, B.J., and Schaaf, Jr., B.W. – Friction Weld Ductility and Toughness as Influenced by Inclusion Morphology, 171-s to 178-s (Jul).
Wu, S.M. and Owusu-Ofori, S.P. – Signature Analysis of Contact Voltage of Resistance Welds, 185-s to 189-s (Jul).

Yurioka, N., Mori, N., Kimura, T. and Oshita, S. – Prevention of Solidification Cracking in Very Low Carbon Steel Welds, 129-s to 136-s (May).
Yurioka, N., Oshita, S. and Saito, S. – Determination of Necessary Preheating Temperature in Steel Welding, 147-s to 153-s (June).

Zhuang, H., Lugscheider, E. and Maier, M. – Surface Reactions and Wetting Mechanisms of Titanium- and Aluminum-Containing Nickel-Base and Iron-Base Alloys During Brazing under Vacuum, 295-s to 300-s (Oct).
